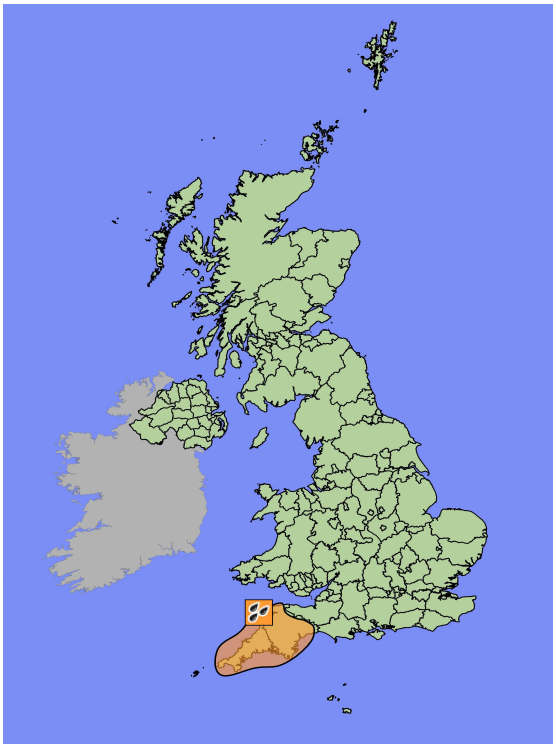
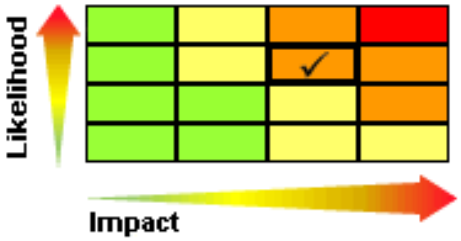
National Severe Weather Warning Service





Chief Forecasters Assessment
Yet another active frontal system is expected to bring spells of rain to many parts of England and Wales during Christmas Eve. An additional 10-20 mm could fall quite widely across southwest England with 30 mm or more in places, particularly over south facing slopes of Dartmoor and Exmoor. Following heavy rainfall during previous days and given already saturated ground this rain is likely to lead to both surface water and river flooding issues.

The Met Office have issued an **Amber Warning** of **Rain**

Valid from **00:05 on Mon, 24th Dec 2012** until **18:00 on Mon, 24th Dec 2012**

Further spells of rain are expected to affect southwest England during Christmas Eve. Given already saturated ground from recent rainfall, the public should be prepared for an increased risk of both surface water and river flooding along with disruption to travel.
